Clean Energy Adds CNG Fueling Stations at Major Airports in Atlanta, GA and Oklahoma City, OK

Now Provides Natural Gas Fueling at 20 US Airports

SEAL BEACH, Calif.--(BUSINESS WIRE)--

Clean Energy Fuels Corp. (Nasdaq:CLNE) will own, operate and supply fuel for new compressed natural gas (CNG) public access stations to support airport operations in Atlanta and Oklahoma City.

In the Atlanta area, the City of College Park, Georgia, contracted with Clean Energy to design, construct and manage a public access CNG fueling station on City-owned property located less than a mile from the entrance to Atlanta's Hartsfield-Jackson International Airport, among the busiest in the world. The facility is designed to serve a range of light, medium and heavy duty vehicles, including regional public transit buses, municipal vehicles, refuse hauling trucks, and airport parking, hotel, and employee CNG shuttle buses. The station will open in two weeks.

In Oklahoma City, Will Rogers World Airport officials contracted with Clean Energy to build and manage a large-scale public access CNG fuel station. Located on airport property, the new facility will serve -- in addition to CNG-powered airport transit and shuttle vehicles -- a growing number of CNG fleets in the area. The station will begin construction in two weeks.

Both stations will fuel high volume fleet applications, including hotel, parking, shared ride shuttles and transit buses.

James Harger, Clean Energy Senior Vice President, said, "We are delighted to have this opportunity to partner with the City of College Park and with Will Rogers World Airport to make these new CNG stations a reality. The facilities will significantly boost local efforts to curtail air pollution and greenhouse gas emissions. At the same time, they will contribute to reductions in transportation operating costs."

Clean Energy is the leading provider of natural gas (CNG and LNG) for transportation in North America. It has a broad customer base in the refuse, transit, ports, shuttle, taxi, trucking, airport and municipal fleet markets, fueling more than 14,000 vehicles daily at over 170 strategic locations across the United States and Canada. Clean Energy del Peru, Clean Energy's Peruvian joint venture, operates the world's largest natural gas vehicle fueling station in Lima, Peru. Please visit www.cleanenergyfuels.com.
