

Clean Energy Expands Fueling Agreements with New and Existing USPS Fleets

NEWPORT BEACH, Calif.--(BUSINESS WIRE)-- [Clean Energy Fuels Corp.](#) (Nasdaq: CLNE) announced that it has signed multiple fueling agreements with United States Postal Service contract-carriers in Florida, New York, Oklahoma, and Texas, increasing the total number of USPS carriers fueling with Clean Energy now to 15.

Signing new deals with Clean Energy is C. Blackburn Trucking Associates, who will fuel four of their Class-8 [heavy-duty trucks](#) at Clean Energy's John F. Kennedy International Airport station. Additionally, G&P Trucking, based out of Springfield, Missouri, will fuel at Clean Energy's [compressed natural gas](#) (CNG) fueling station at the Will Roger's Airport in Oklahoma City, Oklahoma.

Increasing the number of their trucks that use natural gas is Thunder Ridge Transport, a 150-truck carrier servicing 13 states that is based in Springfield, Missouri. They will fuel 20 new CNG trucks out of Clean Energy's Dallas-Fort Worth Station.

St. Augustine, Florida-based Postal Fleet Services, one of the largest USPS carriers, is also adding additional CNG trucks to its fleet fueling in [Texas](#) and Florida.

"The United States Postal Service takes our sustainability goals very seriously. Our carriers live in the very same communities we serve, and we continue to look for ways to reduce our impact on the environment. Since 2005, we have increased the use of alternative fuels by 141%, and we are encouraged that our contract-carriers are using alternative fuels as well," said Bridget Rice, Manager, Surface Transportation CMC at USPS.

"Businesses that require goods to be transported, such as the USPS, continue to demand cleaner fleets in their supply chain. And fleets realize that by reducing their [greenhouse gas emissions](#) as well as NOx by switching to natural gas, they not only help the environment, but they're also winning more business," said Ashley White, Head of Corporate Sustainability at Clean Energy.

About Clean Energy

Clean Energy Fuels Corp. is the leading provider of natural gas fuel for transportation in North America. We build and operate CNG and LNG vehicle fueling stations, manufacture CNG and LNG equipment and technologies, and deliver more CNG and LNG vehicle fuel than any other company in the U.S. Clean Energy also sells Redeem RNG fuel and believes it is the cleanest transportation fuel commercially available, reducing greenhouse gas emissions by up to 70%.
