Clean Energy Names Sean Wine as Chief Revenue Officer

NEWPORT BEACH, Calif.--(BUSINESS WIRE)-- Clean Energy Fuels Corp. (NASDAQ: CLNE), the country's leading provider of renewable natural gas (RNG) for the transportation market, today announced the appointment of Sean Wine as its Chief Revenue Officer (CRO). The CRO position is a first for Clean Energy, as the company places its focus on growth and maximizing revenue opportunities across its business.

Sean Wine, Clean Energy's Chief Revenue Officer.

In his new role, Wine will create and oversee the company's commercial strategy and lead efforts to drive revenue growth, strengthen customer development and pursue market expansion.

"We brought in a global consulting firm to take a hard look at our business, the market and where we have the greatest opportunities to grow," said Clay Corbus, CEO of Clean Energy. "Creating the CRO role is one of the ways we're acting on that work. Sean will bring our revenue divisions together under a single group and better align how we pursue opportunities, manage our customers and ultimately generate revenue."

"The market is moving in a direction we've been preparing for," said Sean Wine. "We're seeing growing demand for the Cummins X15N natural gas engine, high diesel prices driving major fleets to consider RNG, and leading carriers issuing RFPs for new natural gas fueling stations. We've spent years building the infrastructure and RNG supply to serve this market, and my focus now is making sure we have the right commercial strategy and structure to capture that opportunity and execute."

Wine joined Clean Energy in 2006 and has held leadership roles across sales, renewable fuels and business development during his two decades with the company.

Prior to becoming CRO, Wine led Renewables Distribution, overseeing one of the company's most complex profit centers. He has played a central role in developing, commercializing and scaling Clean Energy's RNG business, helping build one of the largest RNG fuel portfolios in North America. He holds a B.A. in Political Science from the University of California, Santa Barbara.

About Clean Energy

Clean Energy Fuels Corp. is the country's largest provider of the cleanest fuel for the transportation market. Our mission is to decarbonize transportation through the development and delivery of renewable natural gas (RNG), a sustainable fuel derived by capturing

methane from organic waste. Clean Energy allows thousands of vehicles, from airport shuttles to city buses to waste and heavy-duty trucks, to reduce their amount of climate-harming greenhouse gas. We operate a vast network of fueling stations across the U.S. and Canada as well as RNG production facilities at dairy farms.
