Clean Energy's Compression Division Sells Sixteen Compressors to Seranco, S.A. for Three Madrid Transit Agency CNG Stations

Deal Comes as European Cities Address Growing Crisis Created by Diesel

MADRID & NEWPORT BEACH, Calif.--(BUSINESS WIRE)-- [Clean Energy Fuels Corp.](#) (Nasdaq: CLNE) announced today that its Compression unit has signed an agreement with Seranco, S.A. for 16 Clean Energy [CleanCNG](#) 2.0 300HP compressors at three Empresa Municipal de Madrid (EMT) fueling facilities throughout the city.

Currently EMT operates approximately 2000 buses which includes 500 that are fueled with [CNG](#). Last month, EMT and the City Council of Madrid approved the purchase of an additional 200 CNG [buses](#) in 2017, to go along with the purchase of 400 made in 2016. The transit agency has a goal of making their entire fleet “clean” by 2019. EMT announced it would continue to purchase CNG buses because they reduce pollutant emissions by 70 percent in relation to diesel – and complies with the strictest European emission regulations.

In December, the city of Madrid joined Paris, Athens and Mexico City in laying out plans to ban diesel from their cities by the year 2025. Madrid already plans to ban cars from 500 acres of its city center by 2020.

“We are proud to perform this project, this will be the first step to improve the air quality of Madrid City in the next years. We hope many other cities will join this process increasing their commitment with the environment,” said Santiago Garrido, CEO of Gas & Go.

“Madrid is just one of a number of cities across Europe and around the world which are taking steps to clean up their air that has become a significant health issue for its citizens, largely caused by the use of diesel,” said Frank Meyer, president of [Clean Energy Compression](#). “We are proud to partner with Seranco to expand EMT’s use of their CNG fleet which is one of the best and quickest ways to address harmful smog.”

Clean Energy Compression is a pioneer in oil-free compression in cylinders and pistons, providing clean gas to the system while protecting the environment by minimizing the amount of lubricant used and keeping the storage capacity constant. Besides the robustness and high reliability of CEC products, the basis of its strength at all points of coverage, is the great experience in manufacturing and maintenance of equipment for CNG.

[About Clean Energy](#)

Clean Energy Fuels Corp. is the leading provider of natural gas fuel for transportation in North America. We build and operate CNG and LNG vehicle fueling stations; manufacture CNG and LNG equipment and technologies; and deliver more CNG and LNG vehicle fuel than any other company in the U.S. Clean Energy also sells Redeem RNG fuel and believes it is the cleanest transportation fuel commercially available, reducing greenhouse gas emissions by up to 70%.
